

High Purity and Industrial Water Systems

Industrial Water Solutions

An A+ Rated Better Business Bureau Company, Industrial Water Solutions has been providing products and services for industrial, commercial, municipal, military, ultra high purity and lab segments for over 80 years. Systems can be made to ASME Code, explosion proof, mounted in containers and made to any customer specification.

- Water Softeners (Flow Rates 1 - 1500 GPM per vessel)
- Fresh and Salt Water RO Systems (Flow Rates up to 400 GPM per Skid)
- Condensate Polisher (Flow Rates 1 - 1000 GPM per vessel)
- Vapor Compression (VC) Distillers (Flow Rates to 120 GPM)
- Deionization (DI) Exchange Tanks (.2 – 44 Cubic Feet)
- Mixed and Twin Bed Deionization Systems (Flow Rates to 1000 GPM)
- Lab Systems (Central and Point of Use)
- Dealkalizers (Flow rates to 500 GPM per vessel)
- Filters (Multimedia, Carbon, Greensand, Calcite, Flow Rates to 1500 GPM per vessel)
- Stainless Steel bag and cartridge Filters and Housings
- 20 – 72 ton Above and Below Ground Bulk Brine Systems
- MIOX On-site chlorine & MOS generation systems (up to 10,000 lb/day)
- PLC Control Systems
- Retrofits, Media Rebeds and Re-commissioning of Existing Equipment
- Build-Own-Operate Systems and Services
- Gas Chlorinators
- Preventative Maintenance Programs
- Service, Parts & Media and RO Membranes (ALL BRANDS)
